

Hello I hope this reaches everyone well and healthy. I'm emailing you regarding the Omni project for summer street. I addressed my concerns at this past ZBA meeting with the amount of traffic being added to the very dangerous corner I live on at 96 summer street. I also voiced my concern regarding the attempt at putting an emergency access road across the street from me in the area of 87 summer street.

I have had to call 911 TWICE in the past 10 days due to accidents on this corner. I expressed how dangerous this corner is and now I feel obligated to share with you and show you what I'm dealing with now. Without hundreds of drivers being added to this road.

The first accident was at 4am up the corner last weekend but was for sure a result of speeding around the corner. There were crews there for hours trying to flip this truck, clean up the trees etc. in fact I didn't even get to go back to bed so we'll say probably about 3 hours.

The second accident I attached a video of the start of this accident that was just now. In the snow. The initial accident involved 3 cars. But then more cars came around a very snowy corner and spun out hitting those cars. Until my husband stood in traffic stopping cars from coming down the hill while we waited 15 minutes in crazy snow conditions for help to arrive and be able to get into the area.

I had 3 cars using my driveway to get out of the line of fire. The person across the street at 87 summer street had 2 in her driveway. Now if there was an emergency access point here. First of all there will now be objects to crash into and constantly be damaged and replaced and the potential to not watch people walk away unharmed from these accidents due to those objects gates etc. But it would have been completely blocked and useless from this accident that is going on an hour now with the road closed still.

I want to remind you I was born and raised in this house. I remember as a child waking up to strangers in my home because they had crashed and needed somewhere warm to wait till the police arrived or my mom would triage their injuries. This is absolutely nothing new about this corner. I've now watched it for 34 years as a child and now as a parent. This is the absolute worst place to put an emergency access point. This is the absolute worst place to be adding hundreds of homes to as well.

But I beg of you rethinks this emergency access area. It has spent 5 hours in the last 10 days unaccessable due to accidents around it. We deserve rest and peace in our home. Not to constantly be startled by accidents running out to god knows what to help whomever in god knows what condition.

Slow this down at the very least and seriously consider these details. This is already a big issue without adding more travelers to this road. Thanks for listening, and thank you for all that you do.

Ps- not even 5 minutes after the road was cleared did two people get stuck in the same spot thankfully the sanding and plowers stopped to help them before they were hit too.

Sincerely

Kait Fargo
